AC[®] Mersea **3000 HU Soybean** *Relative Maturity 2.0*

Characteristics

Growth Habit:	Indeterminate
Plant Type:	Erect
Pubescence:	Grey
Flowers:	White
Pods:	Tan
Plant Height:	87 cm
Lodging Resistance:	Excellent (1.4)
Disease:	Tolerant to phytophthora
Row Width:	7" to 30"
Hilum:	Yellow
Oil Index:	21.2%
Protein Index:	41.8%
Seed Size:	Med (check with seed supplier)
Days to Maturity:	123

Agronomic Performance

- Excellent yield in both wet and dry years
- Adapted to most soil types in Ontario, but particularly adapted to fine textured soils (loams and clay loams)
- Performs well in both conventional and no-till operations
- Tolerant to phytophthora root rot
- The 2-year average from the 2012 Ontario Soybean Variety Trials Report:
 - 104% in the 2900-3300 HU test at the clay sites
 - 106% in the 2900-3300 HU test at the loam sites
 - 104% in the 3300-3500 HU loam test and 98% on clay
- Premiums are available for a white hilum food grade program
- Developed by Agriculture and Agri-Food Canada, Harrow
